Art Unit: 1614

Claims 59-64 are presented for examination.

Applicants' preliminary amendment filed October 25, 2000 and information disclosure statement filed November 13, 2000 have been received and entered.

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/388,725, filed on September 02, 1999.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 59-64 are rejected under 35 U.S.C. 102(b) as being anticipated by Verschoor et al. (AL).

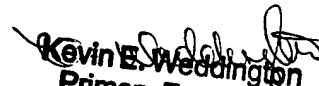

Verschoor et al. teach a method for detecting the presence of a mycobacterium species. Note the reference teaches a biological sample of an animal by detecting at least one intra-cellular mycobacterium antigen of the mycobacteria species in the sample. The cited reference also teaches the test may be in the form of an ELISA plate.

Art Unit: 1614

Clearly the cited reference anticipates the applicants' instant invention, therefore, the applicants' instant invention is unpatentable.

Claims 59-64 are not allowed.
